## Yesterday and Today

Thirty-five years ago the sixth of June last, in a jeweller's shop in a small town across the border, a young U.S. Government clerk, O. Francis Jenkins, using the machine pictured above, which he had just invented, staged the first public exhibition of moving pictures in America.

It remained, however, for the telephone engineer and the scientist, trained in the electrical trans-

## YALE DEANERY LAY CONFERENCE HELD HERE TODAY

The parishes of Abbotsford, Chilliwack, Sardis, Mission, Langley and Surrey are represented at the lay conference of the Rural Deanery of Yale, being held at St. Matthew's parish hall this afternoon and evening, about 35 delegates being present. The two special speakers of the conference are Prof. Day and Mr. McCreery, while Archdeacon F. C. Heathcote presides over the proceedings.

Following a luncheon provided by St. Matthew's church committee and short devotions conducted by Canon Holdon of Chilliwack, the congress resolved itself into discussion and debate upon church affairs, and congenial and constructive fellowship.

## Rich Diversity Of Matsqui's Agricultural Resources Shown At 18th Exhibition Last Week

It is one thing to attain an eminent position, a harder test to retain it. Yet Matsqui fair will undoubtedly go "over the top" again this year as British Columbia's premier rural exhibition, for in number of exhibits and their general excellence last week's event easily eclipsed every previous showing and this outstanding merit will undoubtedly be appreciated by the judges when they compile their comparative records. Matsqui has held her place for three years in presenting the best exhibition, and it is safe to say that those who attended the event at Gifford witnessed the finest rural fair held in the province this year.

Accommodation was taxed, not only for livestock and all outside exhibits, but also in the main building, where many splendid products suffered in appearance because of cramped space. Many prominent breeders from all over the district showed their best, and their animals and birds were a pleasure to the eye of the critical. Inside the building the flower show was indeed a wonder, the handwork of Messrs. Ferguson, Fatkin, Solomon and Carr being most cleverly staged under many fine cuttings. Upstairs the ladies and children's work brought entries from Kamloops, Calgary, Vancouver and all parts of the home district, many of the pieces being exquisitely beautiful and unusually valuable.

The fair was officially declared open on Friday, when the president, Mr. J. Morrison introduced Mr. H. J. Barber, M.P., who spoke very encouragingly of the future of the Fraser Valley. Mr. J. W. Berry, M.P., who was also a visitor, addressed the gathering, expressing his delight at being among so many F.V.M.P.A. shippers, and voiced his astonishment at the quality and quantity of the exhibits. Mrs. H. J. Barber was then presented with a lovely bouquet of flowers, selected from the various prize winning exhibits, and tastefully arranged by Mr. Fatkin. The Hon. Wm. Aitken, Minister of Agriculture, then formally declared the fair open, and presented Mr. Morrison with the government's cheque for the fair grant, and stating in his hearty way the pleasure he felt at attending such a good show.

After dinner, the judging was concluded, and an innovation introduced in a limited auction sale of stock. Among the various disposals was that of Dr. B. B. Marr's beautiful Guernsey bull which went to Frank Bradner for \$145. James Reed of Dewdney bought the Doctor's record-winning cow for \$155, although no reserve was placed on either of these animals. Mr. Menaui of Gifford sold his pure-bred Holstein bull to a Delta dairyman for \$125, and W. C. Haywood of Langley Prairie sold three pure-bred bull calves, Guernseys, the lowest bringing \$28, the highest \$70, one of the purchasers being Councilman Mutch. Other stock was sold, Messrs. Atkinson, Berry, Jack Tompson and H. G. Myhre each enjoying a short shift in the ring and their ring, and the auctioneers' impromptu convention.

The day closed with the usual big dance, the hall being prettily decorated for the occasion, encore after encore being demanded by the crowd, which appreciated the excellent music of the fair Board's orchestra.

Figures will perhaps best illustrate the success of Matsqui's eighteenth fair. There were 174 entries of cattle and horses, 300 entries of poultry, 39 entries of sheep, 24 entries of swine, and scores more entries in all building exhibits over last year. Gate receipts totalled \$172; entrance fees \$224; dance admissions \$156; concessions \$35; \$50 grant from School Board; \$300 from Provincial government; \$92 rebate to Farmers' Institute from Department of Agriculture.

Having won the Barber Cup for floral exhibits three times in succession, Mr. F. Fatkin will now permanently possess the trophy. Mr. W. Menaui wins the cup presented by the Canadian Bank of Commerce, Matsqui for the highest aggregate of points in live stock, having won eight firsts and five seconds. D. J. Wood, Gifford came second with seven firsts and four seconds. Dr. B. B. Marr of Langley will possess for one year the championship cup for best dairy cow in the show.

Prizes as follows were offered and collected: horses, 37, \$145 offered; paid out, 1st \$70; 2nd \$23. Cattle, 198, \$500 offered; paid out, 1st \$287; 2nd \$104. Sheep, 39, \$75 offered; paid out, 1st \$35.50, 2nd \$6. Swine, 16, offered \$142; paid out, 1st \$53; 2nd \$3.50. Poultry, 203, offered \$316, paid out \$114.25, 2nd \$31. ( )

Complete list of prize winners follows: Horses, 1500-lbs and over (heavy)—Team, in harness, O. L. Bates; Single H. or M., J. Mutch, A. L. Bates; Brood Mare, J. Mutch, Foal, 1929, R. C. Sibbald; Horses, 1300 to 1500-lbs (agricultural)—Team, in harness, J. L. Inglis, L. Coghill; Single H. or M., D. J. Wood, J. L. Inglis; Single H. or M. 2-yrs., A. L. Bates, G. Smith; Brood Mare, D. J. Wood, R. C. Sibbald; Foal, 1929, R. C. Sibbald, D. J. Wood.

Horses under 1300-lbs. (General purpose)—Single H. or M., D. Renner, D. J. Wood; Saddle H. over 14 hundred weight, D. Buchanan, R. C. Sibbald; Pony, under 14, D. J. Wood; Best groomed and decorated team and harness, J. L. Inglis; Best Mare or Gelding in show, J. L. Inglis.

Holsteins, (pure bred)—Bull, over 2½ years, W. Paige; Bull, 1 year and under 2½, Mr. Manuel; Bull, under 1 yr., Mr. Manuel, 1st and 2nd; Heifer, under 2 years, Mr. Appelby; Heifer, under 1 year, Mr. Manuel, Jerseys, (pure bred)—Bull, over 2½ years, J. Handy, H. Walker; Bull, 1 year and under 2½ years, J. Reid, C. A. Purver; Bull, under 1 year, E. S. Milwood; Cow, any age, J. Reeve, Mr. Gallagher; Heifer, under 2 years, C. A. Purver, J. Reeve; Heifer, under 1 year, J. Reeve, S. F. Harvey; Heifer, under 1 year, J. Reeve, 1st and 2nd; Calf, under 6 months, Mr. Gallagher, Guernseys, (pure bred)—Bull, over 2½ years, Dr. Marr; Bull, 1 year and under 2½, Mr. Vanetta; Dr. Marr; Bull, under 1 year, Mr. Heywood, 1st and 2nd; Cow, any age, Dr. Marr, Vanetta; Heifer, under 3 years, A. L. Bates; Heifer, under 1 year, Mr. Van-

## MATSQUI

At the special behest of Puyallup Fair Association, Mr. R. C. Sibbald has taken his flock of Cheviot sheep and champion dog to the Washington fair. He will also attend the Oregon state fair at Salem before returning.

Mr. E. Emmans of Matsqui sustained a broken arm, and is being treated in the M.S.A. hospital.

Marriage.—Mr. Ernest R. Willis of Sardis, to Miss Ivy Sarah Jelley, eldest daughter of Mr. and Mrs. W. P. Jelley, formerly of Bradner, in Vancouver by Rev. W. E. Gilbert.

Dr. J. F. Wood is one of the judges of Milner fair this week.

A branch of United Farmers of Canada, was formed at Aldergrove last week, 28 signing up for memberships.

Trout fishing is likely to be even better this fall, if the big run of pink salmon reported from the mouth of the Fraser river is any indication.

## UPPER SUMAS

Mr. and Mrs. Benson and Mrs. Beatty and children were Sunday guests of Mrs. W. H. Fadden.

Sumas fair closes on September with an old-time dance in Mrs. York's pavilion.

Baling of the hop crop is proceeding in the Sumas gardens, the picking having finished last week. A good average crop of hops of first-class quality was the yield from most of the vines, and the picking weather was ideal.

The Associated Boards of Trade is taking up the appeal of Valley hop growers for a stabilized tariff against European hops, which are a menace to the Canadian industry.

Three new tobacco-drying and storage sheds, have been erected on the Hungarian farm at Sumas, and harvesting is now in progress. The manufacturing plant and blending equipment is being installed in Vancouver.

As many as six grain cars are to be seen loading at Whatcom road siding. The crop has been a satisfactory one this year.

Mrs. L. C. York and children have returned home to Vancouver after a visit with her daughter, Mrs. W. G. Fadden, Sumas Prairie.

## SUMAS GAME ASSOCIATION TO HOLD SHOOT ON SATURDAY

Bird hunters who would be "in shape" to hit their birds on the opening days of the season next month should attend the trap shoot to be held on Sumas agricultural grounds on Saturday. A first-class double automatic trap is installed and clay birds and shells are available at reduced prices. All sportsmen are invited and the doings start at 2:30 sharp.

The regular meeting of the Upper Sumas W. I. was held at the home of Mrs. Bears Stewart on Thursday afternoon, September 12th, the vice-president, Mrs. George Fadden presiding.

After routine business, the roll-call was responded to by members present each giving out their birth date and maiden name. This was followed by a quotation from a birthday book of Tennyson's poems. Upper Sumas, Port Essington, Clinton, Ont.; Port Hawkesbury, Nova Scotia, St. Paul, Minnesota; figured among the birth-places.

The program was "Pioneer Days in Sumas and Locality". Mrs. W. H. Fadden recalled her first trip to Upper Sumas in 1886, crossing the river from New Westminster on the old ferryboat Kide K. (run by her brother, the late Captain Wm. Grant) to Brownsville on the south bank, there taking the stage driven by Mr. Fraser York, who made a weekly trip between Sumas and New Westminster; an all-day drive each way. What a contrast to the present modes of travel, motors and tram-cars making the trip now in an hour or two.

Another way of reaching the city was to drive very early in the morning to Mt. Lehman to take the river boat about 7 o'clock. The team and wagon, our mode of travel, none too speedy a way over poor roads, and sometimes arriving a trifle behind time, to see the steamer fading from view down the river, and the weary trip to be gone over again.

Horseback riding was a very general means of travel in those days, oftentimes parents carrying a child along on their horses, to church, to parties or on a visit to the neighbors, and many children rode to school; one instance being cited where a small girl, (Lennie Roscoe), rode a buckskin named Clyde, and she rode as comfortably

of Sumas-Abbotsford Agricultural Assn

Thursday, Sept. 26

Farmers, Merchants and All Residents are Urged to Get Behind this event, which is promoted to creditably show what the district can produce. This is the third event, and it will positively be "bigger and better"

## Old-Time Dance at Night

Upper Sumas post office. Some of the families coming to this post office for their mail were: McCrimmons, Munro's Fraser's, Currie's, Vachon's and several others.

The burning of the home of Mr. and Mrs. Amos Bowman gave Sumas people a thrill over its first court case, Captain Pittendrigh, a magistrate of New Westminster taking evidence etc.

The ride around the lake shore to attend the opening of the Lower Sumas church, built by a resident contractor, O. B. Ackerman, who then lived on the place now owned by Mrs. Everett; bumpily bump, in the heavy wagon, where ever the going seemed the best, was taken as a matter of course, a way of getting there, and yet a novel experience to the writer.

Incidents of the many years when the floods and mosquitoes were such a menace the occasion of the celebration of King Edward's coronation day, when the high water on the prairie enabled a steamboat to land excursionists within a short distance of the old hall; the memorable picnic, with sports and horse-races, for men and women on the 24th of May.

Remembrances of the good old days when sociability and neighborliness were more noticeable than they seem to be at the present time—had to be curtailed, for the closing hour had arrived; the cup of tea and refreshments were waiting, and the special cake made for the member's "Birthday Tea", had to be sampled, and so an interesting afternoon came to an end.

The meeting in November will be held at the municipal hall, when "Immigration", will be the topic, it will also be "Company Day", each member being requested to bring a guest; new settlers especially being welcomed.

# Community Beautiful Association Offers Prizes For Best Efforts To Improve Farm Cottages

As part of a Dominion wide plan to farm owners and others, the benefits accruing from the brightening up and modernizing of the farm home and surroundings, a novel demonstration is being arranged by the Canadian Home and Community Beautiful Association, according to Lee B. Judson, managing director of the Association, Montreal.

The magical transformation of a bare farm cottage and its immediate surroundings into a thing of beauty, in a demonstration lasting only two hours, is the novel event planned to take place before the end of this month, and to which the Rt. Hon. J. T. Thomas, Lord Privy Seal and Minister of Employment in the British Cabinet, has been invited by the Association.

The scene will be eight miles from London, Ontario, at the location of one of a hundred and fifty cottages built throughout Canada by the Department of Colonization and Development of the Canadian Pacific Railway, under an agreement with the Overseas Settlement Committee of the British Government. The London Chamber of Commerce is collaborating with the Canadian Home and Community Beautiful Association in the latter's arrangements to dramatize, as Mr. Judson calls it, the "Canadian Clean Up, Fix Up, and Keep It Up" idea on the farm.

As part of the demonstration the Rt. Hon. Mr. Thomas will be asked to apply part of the first coat of paint to the cottage exterior from automatic spraying equipment. Simultaneously a crew of paper hangers will be busy on the inside. Shrubs will be planted near the entrance to the cottage. Window boxes of a type, which a farmer can easily make, will be adjusted, and the whole effect will be to work a remarkable transformation before the eyes of the official committee and spectators, in two hours or less.

"Demonstrations such as the one arranged for," said Mr. Judson, in an interview, "are not entirely new, but this one is unique in that the sponsors will comprise newspaper and moving picture representatives, provincial, agriculture, trade, civic, chambers of commerce, British Government and Canadian Pacific Colonization officials."

The cottages built under arrangement between the Canadian Pacific and the Overseas Settlement Committee, are pre-eminent in the opportunity afforded in the important mission of illustrating the idea of the brightening up of the farm and the consequent enhancement of the farm morale. With this as a nucleus the Canadian Home and Community Beautiful Association hopes to influence more owners of farms throughout the Dominion to make their buildings more presentable. Through more colorful surroundings and better housing methods, living conditions on the farm will not only be made more attractive to Britishers who come to the Dominion to take up farming, but the principles advocated by the Association will help the farm owner to cut down that enormous depreciation which follows when buildings are permitted to deteriorate.

There are thousands of home owners, not only on farms, but in towns and cities of Canada, who would find the greatest benefits in the modernizing of their buildings, whether it be through merely freshening up of an old place with paint or by means of alterations. Many people think that such improvements are not for them, that modernizing is too complicated or costs a great deal. And so it is the purpose of the Canadian Home and Community Beautiful Association, working with the Chambers of Commerce and Improvement Associations over all the Dominion to demonstrate how the advantageous results can be obtained, and then advise the farm owner regarding the availability of necessary material and equipment to do the work, costs and other details. This in a way may be looked upon as simply augmenting the fine work which governmental and other agencies have done, but we are in a position to co-ordinate many factors with the one end in view.

"It was not so long ago," concluded Mr. Judson, "that you could only interest the average farmer by talking very frankly and emphatically about increasing the life of his buildings and equipment by modern 'Save the Surface' methods. All

references to beautifying alarmed him because it suggested extravagance. This is no longer true because through such educational movements as our own, it is realized that the brightening up and proper maintenance of the farm home and buildings increases the property value, and today with so many visitors from other countries travelling through the Dominion, the effect of more attention bestowed on farm buildings creates a very desirable impression."

It is understood that the Canadian Home and Community Beautiful Association will offer several prizes in the near future for the best efforts at improvement made by the occupants of farm cottages in various parts of the Dominion.

## The Mystery of Sleep

One Of Puzzling Questions Science Is Unable To Solve

Human beings are said by a physician to be divided into two classes, those who say they sleep like logs, and those who never get a wink, and seem rather proud to tell you about it. Actually both are wrong. Those who complain that they spend night after night just lying awake prove they are romancing by the mere fact that they are alive to tell the tale. While we sleep the wear and tear in our bodies is made good; without it we die. According to a scientist who expressed his theories recently, the soundest sleeper wakes up between thirty and forty times a night, without remembering it—so that no one "sleeps like a log." As a rule, women sleep more peacefully than men. This question of slumber is one of the most baffling which science has to solve. No one has yet discovered why we fall asleep. Some change must occur in our body, just as a motor-engine will only stop when you switch off or something goes wrong.

## Releasing More Pheasants

The Calgary Fish and Game Association is to release more pheasants in Southern Alberta. In the past five years thousands of ring-necked pheasants have been distributed in the province. It has been found that these birds thrive in Southern Alberta even in the winter months and are multiplying rapidly.

Farm production in Alberta last year totalled value of \$264,607,299.

## How To Maintain Poultry Production

One Of Approved Methods Is Feeding Wet Mash

From now on one of the main problems of the poultryman is to maintain production; and one of the approved methods of doing so is to feed wet mash. This may be the regular laying mash mixed to a crumbly consistency with milk or a special mash prepared with one-third of its weight semi-solid butter-milk. About three pounds of this mash is fed to each 100 hens.

On most Canadian and United States farms the mash is fed at noon. A system that is favored by English poultrymen is to feed the wet mash just before the birds go to roost at night. The regular grain ration is fed in troughs an hour before dusk. Half an hour later the mash is fed as much as the birds will clean up.

The argument of the English poultryman is that the birds will eat plenty of mash in the morning, as they are hungry, but that feeding last thing at night means that the birds eat that much additional mash.

## Household Insects

Valuable Booklet Issued By Department Of Agriculture, At Ottawa

The latest bulletin of the press prepared by the Federal Department of Agriculture is "Household Insects and Their Control."

It deals with two-winged flies, body parasites, wasps, insects affecting foodstuffs, clothing, carpets, furniture, tobacco, books, seeds, and in fact anything that creeps, crawls or flies that may adversely affect anything within the four walls of the home.

The publication is well illustrated and if you find entomological specimens in the home you do not recognize, a comparison with the illustrations will quickly place the insect and the remedy for it will be found.

Every home should have a copy of this bulletin which will be sent free on receipt of a card by the Publications Branch, Department of Agriculture, Ottawa.

## Yoho Beauty Spot In B.C.

Yoho, National Park in British Columbia, on the west slope of the Rockies, is rich in beautiful scenery. The Takakaw Falls in the Yoho Valley, are among the most outstanding points of interest. This exquisite waterfall has the distinction of being the highest in Canada.

Close to 35,000 persons are employed in road construction in Canada each year.

## Won Rose Trophy

Judged among thousands of blooms at the Rose Society of Ontario show, held recently at the Royal York Hotel, Toronto, the above "Gloire de Ch. Guino'sette" was awarded the Challenge Trophy as best rose exhibited. It was raised by Mrs. R. W. Dixon, of Toronto, in an outdoor garden. The roses on exhibit ranged from pure white of large and small dimensions to the vivid red of American Beauties, making the ballroom at the Royal York a blaze of perfumed color. There was a record number of entries this year.

## Sheep For Manitoba Farms

Movement Is Started To Build Up Numerous Flocks In The Province

A movement to place sheep on Manitoba farms is now under way to a good start under distinguished patronage. The Manitoba Livestock Credit Company Limited, (which is not a commercial concern in the ordinary sense), purposes to distribute 7,000 Rambouillet ewes and 3,000 cross-breeds this season, as a start, towards the building up of numerous flocks in the province. Sheep will be sold only to farmers whose applications are approved by a committee formed for that purpose.

## A Miniature Cow

World's Smallest Is Quite Perfect, Weighs 40 Pounds

What is supposed to be the world's smallest cow, "Daisy," was recently on exhibition at the Rand Show, South Africa. The little mite, who was born from ordinary parents in far-away Buenos Ayres (South America), is 6½ years old, stands only a few inches high and weighs in the vicinity of about 40 pounds. She is absolutely perfect in every detail, she is insured with Lloyds for \$25,000, and her carcass will be presented to the British Museum after death.

"Don't worry if your job is small, and your rewards are few. Remember that the mighty oak was once a nut like you."

Klinger: "Why did you paint your house pink?"  
Singer: "To show it's in good condition."

In Japan automobiles have to be illuminated inside as well as outside at sunset.

## Monopolizes Jap Market

Canadian Wheat Has Supplanted All Others Says Flour King

The importance of the Japanese market to Canada may be illustrated by an interview in the "Vancouver Province" with Tsuchiro Shoda, the flour king of Japan, who is president of the Nishin Flour Mills Company, and operates twelve mills in different parts of that country with a capacity of 25,000 barrels a day. He is reported to have said that his company alone imports an average of 250,000 tons of Canadian wheat annually, which would be equal to about 8,500,000 bushels. Our total exports of wheat to Japan in the calendar year 1923, were 16,977,291 bushels valued at \$16,914,884, so that Mr. Shoda is apparently the customer for one-half of it. In addition, we shipped to Japan that year 96,553 barrels of wheat flour, valued at \$491,109, which, no doubt, came into competition with his product. Sixteen years ago, when he made his first visit to this continent, Japan depended on the northwestern United States for its wheat, and Vancouver was unknown as a grain-exporting port. Today conditions are reversed and Canadian wheat monopolizes the Japanese market. Mr. Shoda says that price and quality are the factors which enabled Canadian wheat to supplant American wheat there. Manchurian wheat might be a serious rival were it not for uncertainty of deliveries, lack of handling facilities and absence of organized grading.

## Strawberries For England

Trial Shipment Of Treated Fruit Sent From Victoria

A trial shipment to England of five barrels of strawberries, which had been given the sulphur dioxide treatment, has been made by growers at Gordon Head, Vancouver Island. At first local customs officials objected to giving clearance to the berries on the ground that the use of chemicals would bar their entry as foodstuffs. It was, however, explained that this treatment was largely used in the Old Country as a temporary way of preserving berries until they were jammed, the chemical being drawn off and the berries restored to their natural appearance in the jamming process. Clearance was accordingly given after the matter had been referred to Ottawa and shipment was made from Victoria. Each barrel containing approximately 300 lbs. of berries.

## Enlarged Grain Elevator

Building At Vulcan Brings Capacity Up To 90,000 Bushels

The town of Vulcan, in southern Alberta, which has won a name for itself by extensive shipments of grain, is having one of its nine elevators enlarged. The new building will increase the capacity by some 30,000 bushels, making the total 90,000 bushels. The grain handling facilities will be improved to increase speed and capacity, and electric equipment will be installed to furnish power.

Impressed With Mining Development

Back from his annual tour of inspection of the West, Grant Hall, senior vice-president of the Canadian Pacific Railway, expressed himself as greatly impressed with the development of mining in the north and west of Canada, in which Consolidated Smelters is taking a leading part.

The male has one advantage. When the heat becomes unbearable, he has something to take off.

A profile photograph is merely a shadow.

# Believes Purchasing Power Of Western Canada Farmers Will Be Unimpaired By Light Crop

## The Bacon Hog and Grading

Standardization Of Hogs Necessary Step To Development Of Bacon Hog Business

The more the producer of bacon hogs knows about hogs, and the requirements of the market to which he is shipping, the greater will be the satisfaction and the profits derived from the business.

The standardization of hogs was a necessary and logical step in the further development of the bacon business, but hogs cannot be bred and grown to a standard type unless the producer has a thorough knowledge of the requirements of the standard.

For this reason a handbook on the "Bacon Hog and Hog Grading" was published by the Federal Department of Agriculture, and quite recently a revised edition of this pamphlet has been printed.

The reasons for producing a bacon hog are outlined in this pamphlet, also a description of the bacon hog, the breeds of hogs with illustrations, the official hog grades and grading regulations, and the necessity for grading. In fact, all the information needed by the producer in order to enable him to fill market requirements no matter how discriminating they may be.

All breeders of hogs should secure this pamphlet from the Publications Branch, Department of Agriculture, Ottawa, and if there is any further information desired the hog graders at the stock yards, the live stock promoters, or the Dominion Live Stock Branch, Ottawa, will be glad to answer enquiries.

## Makes a Difference

Indian Sun Dance Pagan But Dancing Contests Belong To Civilization

Down in the neighborhood of Pocatello, Idaho, the Fort Hall Indians have been showing how primitive and pagan our aborigines can be, even after the United States Government has done its best to civilize and educate them. They held a three-day sun dance. With only short rest periods, and with nothing much to eat and drink, these benighted savages postured and gyrated for the glory of their tribe. All this takes place in the sagebrush, and the Indians, we blush to say, wear hardly any clothes.

Now let us moralize a bit. If these poor Indians were civilized whites in a large American city, what would they do? Probably they would be very up to date and enter a Marathon dancing contest in a hall. They would dance continuously, with only brief rest periods and with nothing much to eat or drink. Only, of course, being civilized, they would not stop at the end of three days. They would try to make it three weeks, and thereby set a record and get a week's engagement in a cheap vaudeville house. While doing this for a cut of the gate receipts, they would, we blush to say, wear hardly any clothes.

No wonder they keep Indians on reservations. They are really pagans at heart. — Spokane Spokesman-Review.

## Drought In Argentina

Much Anxiety Felt By Grain And Cattle Traders

Canadian farmers are not the only ones who are experiencing anxious times in connection with the prolonged spell of dry weather. According to reports received by the Department of Trade and Commerce, Canada's chief competitor in the world wheat markets, Argentina, has also been experiencing a prolonged drought, and much anxiety is felt by the grain and cattle traders. Not only is pasturage in that country threatened, but the work of ploughing and sowing for next year's major crop is held back by the hard state of the soil. In addition, wheat prices are below normally remunerative prices to the farmers.

## Grain Elevator Merger

A total of 339 country elevators with a capacity of 7,250,000 bushels are now controlled by the New Federal Grain Limited in the merger of Stewart Terminals, Consolidated Elevator, McLaughlin Elevator, Union Grain, Northwestern Elevator, Topper Grain, and Brooks Elevator. J. C. Gage will be president, and A. E. Sellers vice-president.

## Sunspots and Tree Growth

In some localities the thickness of the annual growth-rings of trees varies in a period of about eleven and a half years corresponding to the sunspot variations. It is believed that changes in ultra-violet light, cloudiness, and rainfall, are the chief variables in causing this relationship. — Dominion Observatory, Ottawa.

Mistress: "Mary, has the druggist sent the sleeping powder, yet?"  
Maid: "No, ma'am."

Mistress: "Then ring him up and ask him if he expects me to keep awake all night waiting for it."

That the purchasing power of the farmers of Western Canada will be at least as great after the present crop is harvested as it has been during the past year, is the considered opinion of C. W. Peterson, of Calgary. Mr. Peterson is well known in Eastern Canada as an expert authority of Western Canadian conditions and his analysis of the situation as given below is of importance to the business interests of the country.

Mr. Peterson says: "Estimating yields in seasons such as this, when the contrast between good and poor farming is so enormous, is mere guess-work. In Southern Alberta, excellent winter wheat yields and the effect of irrigation development are important factors. It is, however, absolutely safe to assume that results will easily exceed the lowest average yield for the past 25 years of 11 bushels per acre, which would total 265,000,000."

"A comparison of probable yield with last year is instructive. The 1923 prairie wheat crop averaged 21.4 bushels per acre. The average price realized did not exceed 98 cents per bushel at Fort William, netting 85 cents. With eleven bushels average in 1929 of No. 2 Northern, it will at present prices net the farmer \$1.56. His average acre receipts for 1928, were \$18.27, from which deduct cost of the harvesting and hauling of the excess 10½ bushels over 1929 yield, at least 16 cents per bushel, or \$1.68, making net price realized per acre \$16.59, as compared with \$4.45 for the smaller crop of 1929 of higher quality, higher price and smaller handling cost. From a standpoint of farmer purchasing power, it seems about as broad as it is long, at the very lowest estimate."

## Owens His Business

Work Hard To Be Successful Says Eighteen-Year-Old Bootblack

"Streets have their epic as the mountains do, and the story of a Winnipeg shoe-shine boy is undoubtedly one of them," says the Winnipeg Evening Tribune. "Speak with this boy, as his tall rag rhythms its run-a-tum-tum across gleaming leather, and you will not long be wondering how, within three years after leaving school, he became probably the youngest employer of labor in the city."

"For Stanley Ostapowicz, the 18-year-old son of a Ukrainian father and Polish mother, is the alert owner of a flourishing little business netting him an income which might be envied by many grown men of larger opportunities. Stan's opportunities have been mostly of his own making. He owes his independence to nothing but natural curiosity and a passion for being his own boss. You might divine these qualities from the keen, face, frank eyes and lightning quickness of uptake, but you would never imagine all the energy and ingenuity that have gone to the building of his little castle, brick by brick."

"Course, you know," he gravely observes, "slathering on some more polish, 'course, you've gotta work hard when you're on your own. I enjoy hard work when it's for myself."

## Made To Last

When the Romans made shoes they made them to last. In the course of excavating the foundation for the new Bank of England, several soles of Roman shoes were unearthed, of which distinctly bore the seal of a Roman eagle. Three thicknesses of leather were held together by copper rivets. They were in fair state of preservation, even though they are estimated to be more than 2,200 years old.

## Saved By Quick Thinking

Mrs. Kent sat up suddenly in bed. "Sh! I hear some one prowling around downstairs." Mr. Kent trembled but he was a quick thinker. "All right, I'll go down. It's probably that pretty girl handmaid that's been in the neighborhood—a sweet thing who kisses her way out of trouble."

His wife grabbed him. "You stay here, you'll let them rob the place."

## To Speed Ocean Mail

An attachment placed on the Leviathan will speed up ocean mail delivery to such an extent that letters will be delivered in three days. The attachment will enable planes to snatch the mail off he ship 600 miles out at sea and speed in to shore with it.

"You rogue! You haven't cleaned your teeth." — Lustige Blaetter, Berlin.

## FASHION

No. 834—Sung Hips. This style is designed in sizes 16, 18, 20 years, 36, 38, 40, 42 and 44 inches bust measure. Size 36 requires 2½ yards of 40-inch material with ¾ yard of 36-inch contrasting.

## No More Open End

This is the east end of the Trans-Canada going west. The Canadian Pacific has abolished the open end and substituted a vita-glazed solarium. In addition, the new cars, which are given over to the public in entirety, contain two shower-baths, a ladies lounge, a smoking-room and an observation-lounge. There is a buffet too. The bathrooms are in green tile, the upholstery in tapestries and soft coloured leathers.

"So you are an orphan, Johanna?"  
Your father died before you were born?"

"Yes, Professor."

"And did your mother die before your father?" — En Rolig Halv Timma, Gothenburg.

## Our Meat Section

## CLAYBURN

Mr. Fred Healy of Vancouver spent the week-end visiting his parents.  
Mr. Fred Wilkinson of Vancouver spent the week-end as the guest of his parents.  
Mrs. J. Case and Miss I. Case have returned home from Sardis, where they were picking hops.  
Messrs John McGarva and C. Yule shot a deer on Sumas mountain at the week-end.  
Mr. and Mrs. A. Kay have returned home from a holiday spent at Port Alice.  
Miss Esther Rosie of Vancouver is visiting Miss Argentina Venturini.  
Mr. C. T. Purver has returned from Vancouver.  
Mr. Stuart Thompson spent the week-end with his parents.

## Unheralded Bravery

A few days ago two boys near Revelstoke were playing when they were accosted by a large brown bear. The boys had discussed just such a possibility before and had agreed that they would lie down and feign death; it is a well known saying that bears will not touch dead bodies. They naturally took to their heels at the sight of bruin and one of the boys made his getaway the other was overtaken. Seeing that he would soon be within reach of the bear, he lay down and pretended he was dead. The big brown fellow snuffed and pawed him and turned him over according to reports, and then ambled off.

It would have been the natural thing for that boy to get frantic and struggle but his iron nerve and presence of mind probably saved him mutilation, if not his life. Had it been some great feat of daring performed before a gazillion through his name would have heralded across the land as a hero of the people; but the little drama in the depths of the woods, goes by unnoticed. Truly he displayed the courage of the bravest and a will to keep reason supreme over passion, attributes not usually looked for in one so youthful. — Kamloops Sentinel.

## ABBOTSFORD

The grading of the hill at the west end of town, which may be started next week, will complete the grade between Abbotsford and Mt. Lehman on the new Yale road. The road crew continues to work under ideal weather conditions.

Constable Greenwood has been transferred to Kaslo, B. C., and will be succeeded here by Provincial Police officer Hardman, who was on the Nanaimo Police force until almost five years ago when the B. C. P. took charge at Nanaimo and since then he has been a member of the Provincial Police.

Venison steak is a tasty menu item in many local homes this week, several fine bucks having been shot in local woods over the week-end. Scores of hunters were out, and the report is that deer are plentiful this year. Among the lucky nimrods whom we note were able to replenish the family larder are M. Lindores, C. Dawson, G. Munroe, E. Mutch, F. Kelly, A. Kelly, T. Hultsbaum, and Veider mountains, also J. McGarva, R. Serl, C. Yule and M. Murphy bringing in one each. Some of these animals were "spotted" before the season opened, but having been disturbed will not be as easy to approach as on the opening day of the season.

Contractor McDonald has erected a house just west of Abbotsford for Mr. and Mrs. A. Hulton Harrop.

Mrs. Knoll and daughter, Violet left last week to join Mr. Knoll at Everson.

Mr. and Mrs. J. B. Gray and family have moved into Mr. and Mrs. Knoll's house.

Mrs. A. M. Sparling has gone to Seattle for a holiday and to attend the wedding of her sister.

Mr. and Mrs. E. Millar visited the latter's parents, Mr. and Mrs. A. M. King for a few days last week on their return from their honeymoon and left on Sunday for their home in Portland.

Mr. J. M. Rowley is away in Seattle with Mrs. Rowley on his vacation.

Guests at the home of Mrs. P. Inley over the week-end were Mr. and Mrs. Vernon Inley and Miss Doris Inley of New Westminster.

Messrs Ray and Claude Weir, E. Webster and Stewart McDiarmid left on Friday morning on a big game hunt in the vicinity of Buffalo Lake. They expect to be away about a week.

Messrs Glen Rudge and Howard Benedict left by motor on Tuesday morning on a trip to the Cariboo district.

Mr. and Mrs. G. Heller and son Victor returned Friday from a week's trip to visit friends at Williams Lake, Horsefly and nearby Cariboo points. The editor bagged two bear, a brown and a black, and a deer while away. But no moose.

## Work Two Days and a Night Without Rest

Two days and a night without rest—but the telephone men stuck to their job until they had restored service.

A big underground telephone cable was, damaged through no fault of the telephone company. As a result, 600 Vancouver telephones were out of order.

With only an occasional interruption to snatch a bite of food, cable splicers worked all that day, that night and part of the following day—a total stretch of 33 hours, in order to restore service in the quickest possible time. They were down in the damp and cold manholes, with inclement weather to add to their discomforts. But telephone service came first.

## PURE GROCERIES

Make Active, Healthy, Attractive Children

It is just as important to buy wholesome food as it is to buy pure medicines. Whether you are feeling sick or well, or just tired, we have Groceries to suit every occasion. Our line of prepared foods is as varied as can be found anywhere. In this as well as in selecting all other groceries, great care is used to put in stock only the best, and sell at prices that defy competition.

## Keep Radio Aerials off Light Poles

WE issue this periodical warning to radio users that to save human life they must not attach aerials to B.C. Electric poles.

A short time ago an aerial wire snapped, wrapped itself around a 12,000 volt circuit, burned off five wires, deprived an entire section of Vancouver of light and power and endangered the lives of any persons coming near the broken wires.

It is highly dangerous to attach wires to our poles and we warn against this practice.

## Homes and Farm Buildings

The Progressive Home Maker and Farmer nowadays has no time or use for shack fabrication of his buildings—he has found that PERMANENCY IN BUILDINGS PAYS PROFITS, where the make-shift building has no market value when finished, and is therefore a waste of money. Prospective builders are invited to inspect the many substantial jobs erected by Nels Olund's staff, then compare prices, and talk to satisfied customers. For a Durable Job:

Ladies of the W.I. and members of the United Farmers will meet in Poplar community hall on Saturday for the purpose of organizing a local of the cooperative.

Presumption of the death of Harvey Giffin, Matsqui resident, who lost his life in a canoe accident at Cetus Lake on July 13th, has been granted by Mr. Justice Murphy in Supreme Court chambers.

Walter Dods was the successful bidder for the Star touring car which was sold at the Sumas customs office last week. The car, a 1924 model, brought \$17.50.

L. Diether of Vancouver was summoned to Sumas police court on Monday by F. Beltrame, who alleged that 38 of his turkeys had been killed by Diether's hunting dog. The court awarded Mr. Beltrame \$22.50 compensation.

## TRADE BOARD TO SEEK ROAD IMPROVEMENTS NEAR TOWN

Abbotsford Board of Trade decided at a meeting held this week to solicit the public works department to lay sawdust over 150 yards of the road fronting the M.S.A. hospital, in view of the heavy detour traffic now being diverted from the Yale road. An effort is also to be made to have sidewalk constructed from the G.N.R. trestle to the hospital.

Graveling of the new section of the Yale road will also be sought before the fall rains start, and the Department is also to be requested to erect direction posts in the vicinity of Abbotsford.

Future meetings of the Board are to be held on first Mondays at 1 p.m., commencing on October 7.

Program of the forthcoming meeting of the Association of Boards of Trade of the Fraser Valley, to be held here on Saturday next, was discussed, and plans made for a banquet in the Atangard at 7:30 p.m. on Saturday. Several prominent public men from the Coast plan to attend.

Mr. Porritt's application for membership was accepted.

## Oil Men Making Preparations To Drill

Messrs. Wright and Estlin of the Trans-Canada Finance Co. were in Abbotsford last week making initial arrangements for the erection of a derrick on their oil drilling site south-west of the mill. Mr. Estlin was formerly in charge of the B.C. United Oil operations conducted in Abbotsford four or five years ago, and will conduct drilling operations of the new company. They inspected the Sumas Oil Co.'s site and equipment before returning to Vancouver.

## HALL—SMITH

A wedding of interest in the district was quietly solemnized in Vancouver on Saturday last, when Martha, only daughter of Mr. and Mrs. T. D. Smith, Poplar, became the bride of Mr. Norman Hall of Ladner, son of Mr. and Mrs. Hall, Lulu Island, Rev Mr. Morrison officiating.

The first meeting of the Abbotsford and Chilliwack Conservative executive was held at Abbotsford on Wednesday evening. H. J. Barber, M. P., and Hon. Wm. Atkinson, M. P., were present and addressed the meeting gathering. The meeting discussed the importance of having the new grades gravelled as soon as possible and the immediate completion of the link in the inter-provincial highway between Abbotsford and Chilliwack.

## PRIZE LISTS BEING ISSUED FOR THIRD SUMAS EXHIBITION DATED FOR SEPTEMBER 25

Prize lists for the third exhibition of the Sumas-Abbotsford Agricultural Association came off the press last week and are now being distributed by Secretary Blinch. Keeping pace with the development of Sumas district, additions have been made to several of the divisions of exhibits. There are six classes of horses, 19 classes of cattle, with a silver cup as special prize, four classes of sheep, six of goats, two of swine, 32 of poultry, eight of rabbits, 11 of dairy products and honey, 25 of field produce, 34 of vegetables, 35 of fruits, 29 of flowers, 63 of ladies work, cooking, sewing, etc., and 12 of school children's exhibits almost 300 classes in all.

Directors of the Association are Mrs. Hunter, Mrs. Winslow, Mrs. A. Fraser, Mrs. P. H. Dawson, and Messrs. L. O. Lamson, P. H. Dawson, M. Murphy, G. H. Heller, J. L. Starr, W. G. Fadden, J. F. Nelles, C. A. Lamson, A. Campbell and W. C. Peyton. Mr. F. A. Marshall is president, Messrs. J. Frith and E. H. Bley, vice-presidents, and W. C. Blinch secretary-treasurer. The prize list comprises 16 pages with cover, and copies may be obtained of the Secretary or President, any of the Directors or at the News office.

A directors' meeting of the Association is called for tomorrow (Thursday) at 8 p.m., when final details for the event will be arranged. Residents of the Abbotsford and Sumas district are requested to support this event, and strive to make it a good advertisement for the district, by showing their products and stock, and by attendance on Thursday, September 26.

## ABBOTSFORD

Ladies of the Royal Purple are giving a home cooking sale and tea in the Atangard store on Saturday afternoon, proceeds to go to the hospital. The public are invited to patronize the event.

Mr. and Mrs. H. Freeman of Point Roberts visited in town on Tuesday, renewing old acquaintances. They were formerly owners of the Abbotsford hotel.

Messrs. L. Collison and Jack Grimmit of Vancouver visited at the home of Mrs. H. Fraser over the week-end.

The Department of Agriculture has forwarded a cheque for \$25.00 to the management of the Fraser Valley Flower Festival.

Mr. Stewart McDiarmid, brother of Dr. McDiarmid, arrived on Monday from Winnipeg where he is a student at the University of Manitoba.

The many friends of Mr. Bill Crawford will be sorry to learn that he is not progressing very favorably in regaining his health and that he is unable to receive any visitors at the Shaughnessy hospital, Vancouver, where he has been for several months.

An auto accident occurred last week when the car owned by Mr. and Mrs. Turner, Sr., skidded in the loose gravel and crashed into a telephone post when they were returning from Vancouver. Both Mr. and Mrs. Turner were badly hurt. Mr. and Mrs. Turner were pa infuily hurt Mr. Turner lacerating his head and Mrs. Turner had her wrist broken. The car was completely wrecked.

Mrs. M. McMillan is visiting Mrs. Duncan Calder at Mt. Lehman this week.

Your food  
doesn't do you any good  
if you're tired

At the end of a day's work, relieve nervous tension before eating. Wrigley's will refresh and tone you up—so that you're ready to enjoy your food.

Then, after meals, Wrigley's helps digestion, cleanses the teeth, removes all traces of eating or smoking—sweetens the breath.

## WORLD HAPPENINGS BRIEFLY TOLD

"Lord Baden-Powell of Gilwell and Essex" is the title taken by Sir Robert Baden-Powell, founder and chief of the Boy Scout movement.

Control of food prices in Britain is likely to become a matter for legislation when parliament re-assembles.

A recent report issued by the immigration office at Sault Ste. Marie, shows that 12,190 people entered Canada from the United States at this point during June.

Peru has ended its long abstinence from participation in the affairs of the League of Nations. Decision has been made to resume full co-operation in all activities.

Sir Horace Plunkett, veteran Irish statesman, and bachelor, is learning to fly at the age of 75 years. He is taking lessons at the Brooklands air-drome in Surrey, England, and is keen as a boy.

Two Western Canada candidates were successful in the primary examinations for the fellowship of the Royal College of Surgeons, of England. Tests were held in Toronto for the first time in Canada.

Setting a record for all time 121 deaths required a coroner's investigation in Toronto during July. Of these, 39 met violent deaths through industrial mishaps, motor smashes, and other accidents. Suicides and sudden seizures took large tolls.

You can rent an aeroplane at Kansas City, Missouri and fly it yourself if you have a pilot's licence. Saunders' Fly-it-yourself Company, has been formed with 200 sport planes. The rental charge is \$15 and \$20 an hour.

Dr. Hartley Smith, former president of the Toronto Academy of Medicine, and one of the leading physicians in Canada, died at the Toronto General Hospital recently. Dr. Smith was for many years Italian consul in Toronto, and was well known in military circles.

## Exports Of Pulp and Paper

Considerable Increase Shown In First Half Of Current Year

For the first half of the current year exports of pulp and paper were valued at \$97,199,980, as compared with \$94,104,081 in the corresponding six months of 1928, according to the monthly report of the Canadian Pulp and Paper Association. Wood-pulp exports for the period amounted to \$21,470,505, and exports of paper to \$75,729,475, as compared with \$22,339,580, and \$71,764,201 respectively for the first half of 1928. Pulp-wood exports have been smaller this year, the six months' shipments being valued at \$5,942,623, as compared with \$6,926,000.

## More Than Obstinate

"He is so obstinate," said his wife, "he will never do anything he's asked."

"He was always like that," said his old friend. "As boys we were out in a boat once, when a dispute arose, and he was thrown overboard, with the injunction 'Sink or swim'."

"Which did he do?"

"Neither, he lay on his back and floated."

Babies and pianos cause a lot of trouble because people refuse to let them alone.

"It is high time you were insured against accidents, sir."

"Why?"

"You are sitting on the boxing champion's hat."—Lustige Blaetter, Berlin.

## Too Much Low Flying

Habit Is Menace To Public and Should Be Forbidden

Aeroplane pilots crashing as a result of collisions with telephone or telegraph wires or falling on account of losing their flying speed a few hundred feet above the earth brings up the danger of persons on the ground when accidents of this kind occur. The newspapers recently carried a despatch from Kentucky about a student pilot crashing in the centre of the business district of a Kentucky town, killing the aviator and two business men.

Those who are interested in flying and genuinely anxious to promote the development of aviation have been doing everything in their power to bring into effect regulations that will make for the safety of those who fly and those on the ground. Despite their efforts it is possible that too much flying at a low altitude is being done over Western Canadian cities and towns. An aeroplane a few hundred feet above a city street is a menace to citizens. The accident that cost three lives in the Kentucky town might be repeated here.

The authorities, no doubt, would have the hearty co-operation of aviation officials in framing regulations that would prevent flying over cities and towns except at a height that would give the pilot a chance to glide to an open landing place in case of accidents. Furthermore, no pilot should be allowed to fly above or around a city or town who is not familiar with the location of all power, telephone, and telegraph wires.

Aviation is so important that everything possible must be done to reduce risks of every kind.—Regina Daily Post.

## Increasing Elevator Capacity

An Addition Of Over 25,000,000 Bushels To Be Provided This Year

An addition of over 25,000,000 bushels is in the course of being provided to elevator capacity in Canada this year, the additions being principally in Ontario and at Vancouver and Halifax. The projects are: Prescott, 5,500,000; Kingston, 5,000,000; Sarnia, 2,000,000; Midland, 2,000,000; Collingwood, 2,000,000; Port Colborne, 2,000,000; Goderich, 1,000,000, and 1,000,000; Owen Sound, 2,000,000; Vancouver, 3,000,000 and 1,000,000, and Halifax, 1,000,000.

## Winnipeg Newspaper Union

## PARIS COTTON FROCK

It is quite possible to appear smart, dainty and comfortable this season, because Paris decrees the sheer printed cottons are the newest choice for summery wear. Style No. 562 is strikingly effective in printed cotton voile. It is in flattering caprine tones which enhances the charm of the sun-tan complexion. The applied yoke of bodice which boasts of modern influence, is in plain voile in blending tone which appears again in circular inset of skirt. The hip-line is given a swathed effect through drape of skirt. It is a fetching dress for town or resort. It comes in sizes 16, 18, 20 years, 36, 38, 40, 42, 44 and 46 inches bust. Printed lawn, sheer linen in pastel or print, flowered chiffon, shantung, printed rajah silk, crepe de chine, and georgette crepe appropriate. Pattern price 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

## A WESTERN BRIDE

Mr. and Mrs. John Frederick Sanderson, snapped as they were leaving Knox College Chapel, Toronto, following their marriage. The bride was formerly Miss Beryl Hodgins, younger daughter of Mr. and Mrs. W. H. Hodgins, of Moosomin, Sask. The groom, who is the son of Mr. F. G. Sanderson, Liberal whip for the Dominion, is a member of the staff of the London Advertiser, London, Ontario.

## Start Tour Of World

Three Young Women Plan Trip To Remote Places

Arrayed in trim khaki colored breeches and shirts, leather puttees and caps with badges on them, but also wearing lip rouge so they won't be mistaken for motor cycle cops, three young women have set out from New York in a light motor truck to "go places and see things" in remote corners of the earth.

They are heading for Alaska; the party consists of Baroness Christa Von Brandenstein; a movie actress, Miss Nada De Namur, and a girl reporter, Miss Margaret D'Angelo, Ottawa, Ont.

They're going to all the remote places they can find—partly, Miss De Namur confessed, in answer to a masculine challenge that women can't do that sort of thing—and partly on the theory, that, being more patient and painstaking than men, they'll find out a lot of "dope" that the male explorers passed up.

"We're going as far north in Alaska as we can in the car. Then we hope to get an aeroplane ride and after that dog teams until we get away up where no white women have been before.

"And after that we're going to the Gobi desert, the wilds of Australia, Iceland and, oh, lots of places. We expect to circle the globe and get back in about three years."

## Buys Fine Shorthorns

Pedigree Cattle Purchased For Prince Of Wales Ranch

The Prince of Wales is making an important addition of pedigree short-horn cattle to his ranch in Alberta.

Professor Carlyle, manager of the Prince's ranch, has bought from Marshall's of Bridgebank, in the south of Scotland, ten yearling short-horn heifers, a young cow with calf at foot, and two yearling bulls.

The shipment has been tuberculin tested and will leave soon for Canada. The consignment of heifers includes Princess Rhodora, whose dam cost 10,000 guineas; while other famous strains which will be introduced by this shipment, are those of the Lutwyche George Wimple family; Balcairn Barnet heifer by champion of Ireland (Collynie Herd), and a Calrossie White Ensign.

The shipment follows closely the Ayrshires purchased by the Agricultural Department of the University of British Columbia.

## No Butter Shortage

Production In Prairie Provinces Greater Than Last Year

There is evidently not going to be any scarcity of butter in Western Canada this year. Production of creamery butter in the prairie provinces in 1929 is considerably greater than last year.

For the first five months of this year receipts of creamery butter at output in Alberta showed an increase of 18 per cent, compared with the corresponding five months of 1928. The quantity of creamery butter produced in Saskatchewan during the five months under review was 3,831,236 pounds, compared with 2,082,620 pounds during a similar period last year, an increase of 1,748,616 pounds, or 84 per cent. Manitoba creamery butter production was 3,507,849 pounds, compared with 2,608,828 pounds, an increase of 899,021 pounds or 34.5 per cent.

Husband (sternly, to wife who has been shopping): "What do you want with a new frock?"

Wife (happily): "How thoughtful of you, darling! Of course I'd like a new hat to go with it."

The United States imports 3,000,000 pounds of bananas a year.

## Proved His Heroism

George Horne, Toronto Hockey Player, Gave Life For Companions

The other day three Canadian young men found themselves in dire peril when the canoe in which they were travelling on a prospecting tour in Northern Ontario upset.

The men clung to the upturned canoe but when it was seen that the weight of the three of them was more than the boat would stand, one of them struck off to swim for the shore. He was George Alexander Horne, star forward of the Maple Leaf hockey team of Toronto, commonly known to hockey fans as "Shorty." The weather was bad, the lake was rough, and Horne went down before he could reach the land. His two companions state that Horne's action in taking a chance on reaching the shore by swimming undoubtedly saved their lives.

"Shorty" Horne, no doubt, was just an average young Canadian, claiming to be no better than the ordinary run of fellows with whom he associated. He did the things that the average young Canadian does; he played hockey, was active in sports, knew how to handle a canoe, liked the open-air life and the northern waters and hills. No one would pick him out as of heroic stuff, yet when Death, suddenly, in the lashing waters of a Northern lake, threw a challenge in his face, he took up the gauntlet without hesitation that others might have their lives.

Sir Philip Sydney, English knight, gives up the cup of water to the dying soldier; "Shorty" Horne, hockey player and prospector, lays down his life to save two friends.

The race retains its element of greatness.—Regina Daily Post.

## Gas From Cypress Hills

Plan To Supply Saskatchewan Points With Natural Gas

H. I. Cowham, representative of Messrs. Roth and Fauriol, oil gas producers, has been in Moose Jaw recently making arrangements for the development of gas and oil wells in the Cypress Hills to supply gas to the cities of Southern Saskatchewan. He expressed confidence that natural gas could be supplied Moose Jaw and other cities in the south and east from the Cypress Hills where, he states, gas and oil is located.

## Farm Families' Income

According to an estimate made by the Nor-West Farmer, the 248,162 farm families in the three prairie provinces received \$631,450,894 for their 1928 marketings. This makes a cash income of \$2,544 per home in excess of seed, feed, meat, vegetables and other commodities produced and retained by the farmer for his own requirements.

## Find Old Inscriptions

A fossil turtle, belonging to an unknown species, has been found by the Field Museum of Natural History. The shell of the turtle bears six Chinese inscriptions which are thought to be more than 4,000 years old. They are in the earliest of Chinese writing and correspond to the characters on the famous oracle bones of Honan.

Revenue from tourists visiting Canada will, it is expected, total nearly \$300,000,000 this year. Last year tourists spent over \$250,000,000 in the Dominion.

Any first-class watchmaker can deliver selections from his own works.

## ADMIRAL OF THE FLEET

Sir Osmond Rock, commander-in-chief of the Portsmouth Division, British Navy, since 1926, and a Jutland veteran, has been appointed Admiral of the Fleet, to succeed Sir Charles Madden.

## Air Feats Of The Past

Flights and Endurance Records More Thrilling Twenty Years Ago

It is interesting to turn back the calendar 20 years and consider the feat of aviation about which the world was excited at that time. Just two decades ago Louis Bleriot, contemporary of the Wright brothers and a founding father of aviation, performed one of the most spectacular achievements of his day—the first flight across the English Channel. This year thousands of persons will cross the channel in air liners, but in July, 1909, the world marvelled at the little Frenchman's 32-mile flight, accomplished in 37 minutes, ending near Dover with a smashed landing gear and propeller. His rival, Latham, had been fished out of the channel a few days before when an attempt to fly to England failed.

Bleriot was one of the pioneers who faced the elementary problem of getting a flying machine off the ground, and then making it stay up for any length of time. He blazed the trail followed in later years by Lindbergh and his fellows, who use machines in which principles laid down by Bleriot and his contemporaries were followed to the high mark the earlier fliers dreamed about.

It is educational to note also the endurance records of Bleriot's day, as compared with the current performance of Jackson and O'Brien. In August, of 20 years ago, a French flier, Roger Sommer, astonished the world by breaking Wilbur Wright's record and remaining aloft 2 hours 27 minutes and 15 seconds. The improvement of the plane, it may be said, is in the ratio of this record to that of the St. Louis Robin.

## Railway Exhibit At Brandon Fair

The machinery exhibit at the Brandon Fair this year is reported to have been the largest ever held in Canada, exceeding also that of any State fair held across the line. The number of machines, tractors, threshers, and so forth this year was 618 as compared with 499 last year, while the number of firms exhibiting rose from 57 to 74.

## The Cross Of Snow

The famous cross of snow in the Holy Cross National Forest of Colorado is formed by two snow filled crevices on the side of the mountain. The cross is visible for miles.

America has no great cathedrals, but you should see some of the modern bathrooms.

## New Device Demonstrated

Noctovisor Enables Ships To Detect Beacon Through Fog

An invisible eye that can see in the dark and detect the light of a ship two miles away on a black foggy night was introduced to newspapermen at Boxall, Surrey, England, by its inventor, John Baird, of television fame. He calls the invention "noctovisor."

It looks something like a large camera and can be mounted on a ship or aeroplane. It was announced that it would soon be tried on trans-Atlantic liners. For the purpose of demonstration it was mounted in the garden of the cottage of Baird overlooking the twinkling lights of Dorking. In the dark beyond those lights an automobile headlight, three miles away, pointed toward the cottage.

At a signal from the inventor, a sheet of ebonite, as a substitute for a supposed fog, two miles thick, was placed in front of the headlight. Not a glimmer was then visible to the human eye, but it appeared on the noctovisor screen as a bright red disc. It was supposed to have particular value in permitting a navigator in a fog to tell the exact direction of a beacon and to estimate roughly its distance.

The device, in brief terms, is a combination of camera lenses, television receiver and television transmitter, throwing a distant image on the exploring disc of the transmitter, through which it acts on a photo electric cell sensitive to invisible infra-red rays. The receiver amplifies for the observer.

## Shows Upward Trend

Increase In Immigration To Canada From Preferred Countries

The volume of immigration from the British Isles and preferred countries showed a strong upward tendency in the last three months, while the influx from non-preferred countries has been greatly reduced. Between April 1 and June 30 a total of 77,730 immigrants came to Canada, an increase of 10 per cent. over the same months last year.

Of the total immigration, 34,967 came from the British Isles, an increase of 46 per cent. From the United States the figure was 11,290, an increase of 21 per cent.; and from northern European countries 14,496, an increase of eight per cent.

Tourists looking for Sunday parking places will be glad to learn that a few choice ones may still be found near country churches.

No matter how big a man is he cannot afford to belittle others.

# WINDOLITE

MADE IN ENGLAND

## The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays, are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 140 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

## The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

### SYNOPSIS

Marcus, the famous Broadway producer, visits Blackie Joe's New York night club, where he hears Al Stone, Blackie's singing waiter, render a love ballad of his own composition. Marcus offers to buy the song and Al consents on condition that the producer will hire Molly, his sweetheart, to sing the song in one of the Marcus revues. Marcus agrees. Molly treated Al disdainfully before that, because he was only a waiter, but now she makes up to him. Thus the night ends with two persons, Al and Molly, supremely happy. But there is sadness in the heart of Grace, the beautiful cigarette girl, for she is deeply in love with Al. She runs quickly home to hide her tears.

### CHAPTER IX.

Time heals the sharpest wounds, say the philosophers. Perhaps, but the memory of the wounds may last a long, long time. Fortunately is the man or girl who has the strength to keep those memories from becoming bitter.

Grace Farrell, the cigarette girl at Blackie Joe's, was such a person. Al Stone and Molly Winton had left and become headliners on Broadway. As the weeks lengthened into months Grace heard reports of their achievements and saw their pictures in the papers. Al had become one of the outstanding song-writers of Tin-Pan-Alley; his melodious scores featured all the Marcus revues. His ballads and comic numbers had made him famous throughout America. Molly, true to Al's prediction, had become a headliner in the Marcus musical shows.

Once Grace begged time off from Blackie to see the outstanding Marcus show of the season. She had hoped Al would appear, but he didn't. However, Molly was there as one of the featured performers, singing Al's words and melodies. Grace, leaning forward in her first row gallery seat, had to admit Molly put the songs over well. Molly was deaf, graceful, self-possessed, and she knew how to get the most from a song's variations.

"Perhaps I was wrong in thinking she couldn't make Al happy," mused Grace. "She certainly knows her business and she is awfully pretty." Yes, Molly was pretty. Yet Grace's intuition told her, even from this distance, that there was something cold and calculating about her successful blonde rival. Her smile and gaiety made Grace distrust her.

But Grace caught herself up on these critical thoughts—perhaps, she reasoned, they came from jealousy. She determined to stifle them. They weren't fair to Molly.

Occasionally Al revisited Blackie Joe's and received congratulations from his old friends, but Molly never deigned to set foot in the place where she had started her climb up the ladder of fame. "That's Molly—too high-hat," murmured Blackie Joe to Grace in explanation.

Grace never forgot Al's first visit to Blackie's after Broadway had claimed him for its own. She was very busy with her cigarette tray, her head lowered, when a familiar voice inquired:

"How much the lot, Gracie?" Grace almost tipped the tray over in her astonishment—and delight. There stood Al, resplendent in the latest cut of dinner coat, with the same happy, boyish smile, the same kindly eyes, the same white, even teeth.

Al leaned over, before Grace knew what he was about, and kissed her lightly on the cheek. It was merely a quick, friendly peck, with no hint of romantic feeling, but because she was unprepared, Grace blushed crimson.

son. Al did not know that his careless gesture aroused afresh the profound love for him that had caused Grace sleepless nights and that she had managed to control only recently.

But in a moment she recovered herself completely, giving him a friendly smile to match his own. She was determined he should never know how he had, unwittingly, made her suffer.

"We're simply thrilled about your success, Al!" she exclaimed enthusiastically. "Blackie and I and the others here at the club talk of you often. You're a famous man, Al, and you'll be a rich man soon."

"Yes, I suppose so," Al replied, laughing. "It's awfully good or you to think of me."

But Grace thought she detected the faintest shadow cross his mouth.

"What's the matter, Al?" she inquired anxiously. "Isn't everything as you wished?"

"Oh, yes, Grace, everything's K. O.," answered Al.

Then he shook hands with the performers and, after a short talk with Blackie, vanished to the glittering uptown section—to visit Marcus in his palatial skyscraper office overlooking Broadway. They talked over the next revue.

"Well, Al, is genius burning? What price the new songs?"

"They're coming along swell," answered Al quickly. "I've got a South Sea number almost finished and I'm starting on a kid song. I think I'll call it 'Little Feller.' Like that title?"

"Sounds good," said the producer. "Can you let me see both next week?"

"Surest thing," said Al, and nervously rose to leave. He wanted to reach Molly's dressing room at the Manhattan Roof Theatre soon, for the show was just ending. But he also wanted to ask one question.

"How's Molly getting along, Marcus?"

"Great! She's a fine little artist and the crowds take to her."

Al fairly beamed. He didn't care so much about his own success, but whenever anyone praised Molly a happy glow stole over him. His wife was still his dream girl. But now Marcus said a strange thing.

"Everything's all right between you and Molly?"

"Oh, surely! Everything's perfect. Why do you ask?"

"Oh, nothing—but you know in show business, where partners in marriage are both headliners there's often dissension. You and Molly are unusual that way."

Marcus gave a mysterious little smile and Al moved toward the door.

"Molly's the one who's unusual—she's perfect!" said Al, and disappeared through the door.

He wondered what Marcus meant by that mysterious smile, but dismissed it from his mind as he rode down in the elevator. Then he turned the corner, ran across the street, and entered another elevator to be whirled aloft to the Manhattan Roof. He found Molly in her dressing room, garbed for the street, chatting with John Perry.

John Perry was Al's best friend and a peculiar individual. The most peculiar thing about him was his mysterious source of income. He never seemed to work, yet he had plenty of money and spent it freely. Along the White Way they called him a racketeer and said he controlled the illicit distribution of contraband liquor in a district peppered with high class night clubs.

Physically he was decidedly prepossessing, being tall and dark. When Molly and Al had first arrived on Broadway, John Perry had sung their praises—and done them many little favors. Al, who liked everybody, had taken a decided fancy to John and had frequently talked over his songs with the debonaire racketeer.

Molly hadn't seemed to like John so much at first, but lately his charm of manner had won her over, and her attitude had been quite friendly.

Perry jumped up the moment Al entered and proffered his hand.

"Well, Al, old top, I've been visiting Molly. Hope you don't object."

"Not at all," Al dismissed the suggestion with a laugh and a wave of the hand. "I like Molly to meet other men. And you know, John, I regard you as one of my best friends."

John Perry raised his glance toward the ceiling, shrugged his shoulders, but did not answer.

"Shall we go, Al?" said Molly quickly and rather nervously. "I've been waiting for you some time."

"Sure, right away. I was detained talking to Marcus about the new show. I have arranged for you to have the pick of the songs. Where shall we go—to a club or home?"

As they left the dressing room Al went first down the narrow corridor. He did not see Perry give Molly's hand a surreptitious squeeze as she followed.

(To Be Continued.)

## Canadian Trade Office Opened At Chicago

R. S. O'Mera, New Commissioner, Has Had Wide Experience

The importance of U.S.-Canada commerce has been officially recognized with the establishment of a Canadian trade commission office at 8 South Michigan Avenue, Chicago.

R. S. O'Mera is in charge of the office, coming to Chicago on transfer from the Netherlands East Indies. He has also seen service in Malaya, India, and South Africa. M. J. Vechler, of Ottawa, is the assistant trade commissioner.

"Canada is the United States' best customer and the United States is Canada's best customer," O'Mera said in discussing his duties.

"The organization in Chicago marks a new move in the development of trade relations between the Dominion and your country. The prime endeavor to the service is the promotion of Canadian export trade, and with this end in view twenty-eight offices are maintained by my government throughout the world."

"We have had an office in New York for many years. The new Chicago headquarters will look after the territory in the Central States and the Mississippi Valley south to New Orleans. A third United States office is to be opened soon in San Francisco to handle affairs west of the Rockies."

The Chicago office is prepared to assist American importers and manufacturers in many ways, according to O'Mera. It will furnish them with information on Canadian sources of supply for raw materials and manufacturing goods, assisting establishment and adjustment of agency connection in this country and in the extension of branch manufacturing plants in the Dominion.

Assistance will also be given to firms who have obtained engineering or other contracts in Canada, and who are looking for Canadian factories to fill part of their requirements.

The office also welcomes general inquiries in regard to tourist travel and Canadian conditions.

## Town Growing Rapidly

Residents Of The Pas Feel Houses Should Be Numbered

In many respects The Pas is a big town. It has movie theatres, dance halls and a variety of hotels. It has three beer parlors, a government liquor store, and a diversion of rendezvous one finds in a frontier place to sweep away jaded nerves or excitement-hungry spirits.

But its houses lack numbers and some of its streets even lack names.

Until the past year or so The Pas hasn't felt the need of numbers on houses. But visitors are becoming tired of chasing around in circles trying to find the residences of persons. Residents themselves are coming to the conclusion that their pride demands numbers on their houses.

Today, there are close to 800 buildings in The Pas. That is 350 more buildings than could be counted a year ago. So the need of numbers is apparent. The trouble has been that in the past couple of years the town council has been so busy trying to enlarge utilities to care for the swift growth of the north, that the matter of numbering houses remained in the background.

## Will Extend Patronage

His Excellency the Governor-General of Canada will extend his patronage to the Canadian Pacific series of concerts of British and Canadian music to be given across Canada, beginning in the fall of this year and continuing until the spring of 1930, according to J. Murray Gibson, General Publicity Agent of the Canadian Pacific.

## Canadian Sea Fish Catch

The Canadian catch of sea fish in the first half of 1929 had a landed value of \$9,364,822, which was an increase of \$500,000 over the similar period of last year, despite a reduction of 9,000,000 pounds in the weight of the fish caught which amounted to 280,290,000 pounds.

## Forty Bird Sanctuaries

Forty bird sanctuaries have been reserved in Canada by the Department of the Interior under the Migratory Birds Convention Act, which is the Federal law for the protection of migratory birds. There are also fifty-one public shooting grounds reserved by the Dominion Government in Western Canada. Shooting is allowed on these latter areas in the open season.

## Received Compensation

Two years ago George Carmody, a railway engineer, met an elderly man in Indianapolis whose pockets had been picked. He begged for a ticket to his home town in the West, and got it. Now Carmody has been made sole heir by the befriended one's will to 360 acres of coal lands in Canada—with a railway ticket to the property also provided.

## Suggests Boost For Canada

Diet Based On Canadian Products Would Be Good Thing

A new theory by Miss Mary L. Barber, a visitor to the West and a food expert, is that dieting is a fad. "Eat and be healthy" is her slogan. It has come to our notice that most of these diets, the 18-day grapefruit diet; the 16-oranges-a-day-diet; the all-fruit diet and many others are a fine advertisement for products that are raised in the United States. Thousands of men and women who are er-r-plump, eagerly scan the papers, magazines and pamphlets for diets; 99 out of every 100 are based on fruits. It is more than probable that the diets themselves originated where the fruits grow. Of course, we all realize the value of fruit but it seems to us that it might be a good thing if the dieticians in this country got together and originated a number of diets based on Canadian products.

Why wouldn't a diet based on apples be a good thing? An apple for breakfast, apple-sauce sans sugar for lunch, and a baked apple for dinner at night? What more would you wish? Why wouldn't the 18-day apple diet do all the things for you the 18-day grapefruit diet will? We would be consuming our home-grown apples.

On the prairies we don't have to go out of our own province to get a marvelous diet. Take the bran diet. Think of the increase in the consumption of bran if all those who are bent on dieting would go on a bran diet. The dieticians, we are sure, can get out a booklet giving appetizing recipes for the preparing and serving of bran.

Who will produce a real Canadian diet that will boost Canada instead of California?—Regina Daily Post.

## Weighs Canadian Outlook

Bank Of Montreal Says Other Items Will Offset Small Wheat Crop

Canadian prosperity will not be affected by the failure of the wheat crop this year because of numerous favorable features in the commercial field at large, according to a business summary issued by the Bank of Montreal. The report estimates the wheat crop at 300,000,000 bushels, with a possibility that it may not reach this figure, which will be the smallest-crop of wheat in Canada since 1924, when the yield amounted to 262,097,000 bushels. The report says:

"In the five years elapsed since the partial crop failure of 1924, a large development of Canadian resources, industry and trade has occurred, butressing business against a single untoward factor. In that period immense strides have been made in harnessing water powers, in newspaper production, in motor-car industries, in the fabrication of iron and steel, in output of minerals and in all departments of domestic trade, aggregate wealth of the nation is greater than ever before. Midsummer, formerly a slack season in business, now brings a large influx of tourists, whose expenditures enliven many branches, and this year the invasion is making a new high record. Viewing the commercial field at large, it can, indeed, be said that favorable features outnumber the unfavorable and that the volume of commodity production and distribution is at the highest level."

## Checking the Compass

Over 25,000 Measurements Have Been Made In Last Fifty Years

Since 1880, field officers of the Topographical Survey, Department of the Interior, in the course of their regular surveying and mapping operations, have made about 25,000 measurements of the direction of pointing of the magnetic compass needle. Such measurements may be taken by the surveyor in a few minutes, at very little additional expense when he is already on the ground with the necessary instruments.

## New Association For Canada

A number of firms interested in aeronautics are forming an association under the title of "Canadian Aeronautical Chamber of Commerce." The decision was made following a meeting of 35 aircraft representatives in Montreal who were present in the city in connection with the aircraft show. By-laws of the new association have been drawn up, tentatively, and matters of organization planned and outlined. Incorporation is now being sought.

## Miller's Worm Powders

Miller's Worm Powders were devised to promptly relieve children who suffer from the ravages of worms. It is a simple preparation to destroy stomachic and intestinal worms without shock or injury to the most sensitive system. They act thoroughly and painlessly, and though in some cases they may cause vomiting, that is an indication of their powerful action and not of any nauseating property.

## When tea is spilled on a tablecloth, cover the spot immediately with salt. Let it stand for an hour or so. When the cloth is washed the tea stain will have disappeared.

## A professor on the Continent of Europe is able to read and write in two hundred tongues.

## Feeling Run Down?

Over 400,000 women and girls who were weak, "blue," nervous, run-down, and unable to do their work properly, have improved their health by taking Lydia E. Pinkham's Vegetable Compound. By ham's Vegetable Compound, by accurate record, 98 out of every 100 report benefit. You can be almost certain that it will help you too.

## Lydia E. Pinkham's Vegetable Compound

## The Chain Letter

A young man stenographer was hit by a bullet in a holdup. Thinking he was mortally wounded, he whispered to a friend:

"Write to Mamie. Give her my love, and tell her my last thoughts were of her. Carbon copies to Sadie, Peggy and Kathleen."

## Canada To Establish Prison For Juveniles

Money Voted For Institution Says General Hughes

Establishment of a penal institution for young people not hardened in the ways of crime will be brought about within two years, in the opinion of Gen. St. Pierre Hughes, Inspector of Canadian penal institutions.

Although the matter has been dormant since it was first brought up in 1895, the Dominion Government has now appropriated money for the establishment of the juveniles, reformatory or penitentiary, and the institution will be established somewhere near Kingston, Gen. Hughes believes. Young people who must be punished will, through this new institution, be segregated from older and more hardened criminals, instead of being thrown amongst them as is done under present conditions.

## SUMMER COMPLAINTS KILL LITTLE ONES

At the first sign of illness during the hot weather give the little ones Baby's Own Tablets or in a few hours he may be beyond aid. These Tablets will prevent summer complaints if given occasionally to the well child, and will promptly relieve these troubles if they come on suddenly. Baby's Own Tablets should always be kept in every home where there are young children. There is no other medicine as good, and the mother has the guarantee that they are absolutely safe. They are sold by all druggists or will be mailed on receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont.

## Seeking Northern Paradise

Adventurers From Washington State To Investigate Eskimo's Story

The existence of a far north paradise is hinted by Eskimos who told William Leyman, of Kotzebue, of a warmer continent with big rivers and fertile valleys beyond Bering Straits, according to officers of the steamship "Derby," arriving at Tacoma, Wash., from the Alaskan port on her first round trip this season.

As a result of Indian and Eskimo lore prevalent in Kotzebue, Leyman and several adventurers plan to leave by airplane to investigate rumors.

The white men this summer watched wild geese fly far north beyond the Alaskan shores. This incident alone is a contention that warm springs or open water of some kind exists toward the North Pole.

## Use Natural Hot Water

Citizens Of Boise, Idaho, Supplied From Hot Wells

Heating problems have been solved for 200 home owners of Boise, Idaho, who have natural hot water piped into their faucets, it is stated by E. E. Smith, vice-president and general manager of the Boise Water Corporation, in an article in the July issue of the Professional Engineer, monthly organ of the American Association of Engineers. The water comes from the Hot Wells, several miles east of town.

An acre of quagmire was noticed to be warm and never covered by snow in winter. Several men decided to prospect for water and after digging 400 feet found a good flowing supply of hot water. They dug another well, and the two produce 800,000 gallons a day. The water's temperature is around 170 degrees.

## A Flying Yacht

The first flying yacht to be constructed in England, is being built for a private owner at Southampton. The hull is divided in three sections, the forecabin being in the nose, the central portion devoted to passengers, and the kitchen is in the rear compartment. Railings can be erected round the hull and deck chairs and tea tables placed.

## Saskatchewan Creamery Butter

The output of creamery butter in Saskatchewan for the first six months of the year is exactly 45 per cent. greater than for the similar half year of 1928, according to a report of the dairy branch of the Provincial Department of Agriculture. The output in the first half of 1929 was 6,128,044, and in the first half of 1928, 4,215,349 pounds.

## Just Made Him Laugh

Plucky Navigator Not Daunted By Nerve-Racking Experience

A young fellow sailed from Boston for France in a 116-foot open boat equipped with an outboard motor. His chief asset, says the Associated Press dispatch, appeared to be pluck.

Pluck, plus; we should say. What nerve such an undertaking requires! Yet there are plenty of men who have it. We recall in particular Capt. Howard Blackburn, of Gloucester, who once tried the Atlantic crossing alone in an 18-foot sail boat. Off the Grand Banks a storm came up. The exhausted navigator finally threw out a drag to keep the boat's head in the wind and crept into his cabin for a nap. A wave came aboard that threatened to sink the vessel, and that jammed the sliding door to the cabin so that for a time Blackburn couldn't shove it open to let himself out.

"How did you feel?" he was asked. "Well," he replied, "it seemed so ridiculous that I should die that way that I just laughed out loud."

## Little Helps For This Week

"And the Lord shall guide thee continually, and satisfy thy soul in drought."—Isaiah lviii. 11.

My Shepherd is the Lord my God, There is no want I know; His flocks He leads in verdant meads Where tranquil waters flow.

He doth restore my fainting soul With His divine caress, And when I stray He points the way To paths of righteousness.

—Eugene Field.

Through every step in life the Shepherd offers to guide us, if we will but hear His voice and follow Him. He never promises smooth paths, but He does promise safe ones. If we follow Him we may find the steepest cliff "a path of pleasantness," and the lowest value of humiliation as a highway to peace.

—Theodore L. Cuyler.

## Stop the Cough.

Coughing is caused by irritation in the respiratory passages and is the effort to dislodge obstructions that come from inflammation of the mucous membrane. Treatment with Dr. Thomas' Electric Oil will allay the inflammation and in consequence the cough will usually stop. Try it and you will be satisfied.

## A Thousand-Mile Trek

Old Pioneer Tells Of Journey From Rockies To Winnipeg

The story of how twenty-two men walked 1,000 miles from the Rockies to Winnipeg in the autumn and winter of 1881 to return to civilization following the seasonal cessation of railway construction, and how they were cleaned out of all their food by starving Indians, was related by A. E. Tregent, of Vancouver, founder of the first private bank in the west and pioneer settler, who has been a guest at Banff. He was visiting Tom Wilson, discoverer of Lake Louise and the Yoho Valley, with whom he worked out the first preliminary survey party seeking out a practicable route for the Canadian Pacific Railway.

## A Common Variety

Villager (showing stranger over famous cottage): "Three hundred years old this be, sir; never a stick or stone altered in all them years."

Visitor: "I've a landlord like that, too."

## Making Gasoline From Trees

Two Chicago Doctors Claim Production Of Anti-Knock Motor Fuel

"Gasoline" made from trees is announced in a report to the American Chemical Society by Dr. Jacques C. Morrel and Dr. Gustav Egloff of Chicago.

They have produced an anti-knock motor fuel from the tar in the Douglas fir. While this fuel now is in the laboratory stage, the report says it can be made in commercial quantities from present wood waste.

"The development of a practical and economic means of converting wood waste into motor fuels," says the report, "has a deeper significance than the immediately important factor of conservation—it provides a source of motor fuels for the future which is under the direct control of man."

"Our great storehouses of potential motor fuel from petroleum, coal and oil shales are heritages from past ages, while wood tars and other vegetables are producible under controlled conditions.

"Approximately 24 per cent. of the standing tree is converted into useful products, while 76 per cent. is wasted.

"As an example of the possibilities of the utilization of this waste, from an average annual yield of 7,500,000,000 board feet of Douglas fir the equivalent of 2,500,000 cords or 4,200,000 tons is available for destructive distillation, yielding the following:

"Turpentine and light oils, 8,500,000 gallons; tar, 70,000,000 gallons; wood alcohol, 9,750,000 gallons; acetate of lime, 187,500,000 pounds; charcoal, 2,440,000 pounds. And a large yield of gas for fuel.

"The 70,000,000 gallons of tar will produce by cracking according to present research, 23,300,000 gallons of motor fuel equal in anti-knock properties to benzine."

## DOCTORS quite approve the quick comfort of Aspirin. For these perfectly harmless tablets will ease an aching head without penalty. Their increasing use year after year is proof that they do help and can't harm. Take them for any ache; to avoid the pain peculiar to women; many have found them marvelous at such times. The proven directions found in every package of Aspirin tell how to treat colds, sore throat, neuralgia, neuritis, etc. All druggists.
